EXPERIENCE

Cisco

Business Analyst Intern

Feb 2018 - Aug 2018

• Created analytics dashboard for product managers, using R, which provided forecasts and KPIs derived from four relational databases,

• Built tool to detect and correct misspellings of manually input text data. Used webscraping and other text analysis in R programming.

• Created data dictionaries for key datasets in preparation for department restructuring.

Waterworld California

Operations Supervisor / Lifeguard Instructor

Feb 2014 - Oct 2016

• Oversaw daily operations for 120+ lifeguards, EMTs, and security.

• Designed and taught three-day lifeguard courses to employees.

• Awarded for highest standard of water safety by external auditors for three consecutive years.

PROJECTS

Relevocab

relevocab.com

Web app allows user to search, and create flashcards for Spanish vocabulary on a selected subject. Built using React.js, Redux, Firebase, Wikipedia API, Google Translate API.

Emoji Tetris

emojitetris.com

Recreated one of my favorite games, but using emojis, with a few other twists. Created using React.js with hooks for front end, Firebase added for high scores list.

Pattern Overlay Visualizer

patternoverlay.com

Created website with React.js based on a popular Youtube video called Freaky Dot Patterns, which demonstrates unexpected patterns that emerge while rotating and moving overlayed patterns.
