EXPERIENCE

Cisco

Business Analyst Intern
Feb 2018 - Aug 2018

· Created analytics dashboard for product managers, using R, which provided forecasts and KPIs derived from four relational databases.

· Built tool to detect and correct misspellings of manually input text data. Used webscraping and other text analysis in R programming.

· Created documentation and dictionaries for key databases using markdown in preparation for department restructuring.

Waterworld California

Operations Supervisor / Lifeguard Instructor
Feb 2014 - Oct 2016

· Oversaw daily operations for 120+ lifeguards, EMTs, and security.

· Designed and taught three-day lifeguard courses to employees.

· Awarded for highest standard of water safety by external auditors for three consecutive years.

PROJECTS

Vocarta

vocarta.com

Web app allows user to search, and create flashcards for Spanish vocabulary on a selected subject. Built using React.js, Redux, Firebase, Wikipedia API, Google Translate API.

Emoji Tetris

emojitetris.com

Recreated one of my favorite games, using an emoji theme and with a few other twists. Created using React.js with hooks for front end, Firebase added for high scores list.

Pattern Overlay Visualizer

patternoverlay.com

Created website with React.js based on a popular Youtube video called Freaky Dot Patterns, which demonstrates unexpected patterns that emerge while rotating and moving overlayed patterns.
